

# HSW-PC-Truck

user-friendly | versatile | universal

## Advantages

- Easy to use
- Evaluation of all data
- First and second weighing
- Connection to existing SQL database system
- Multitude of interfaces available for peripheral devices
- Customized print-out design using Word

# Control and Evaluation of Vehicle Scale Data

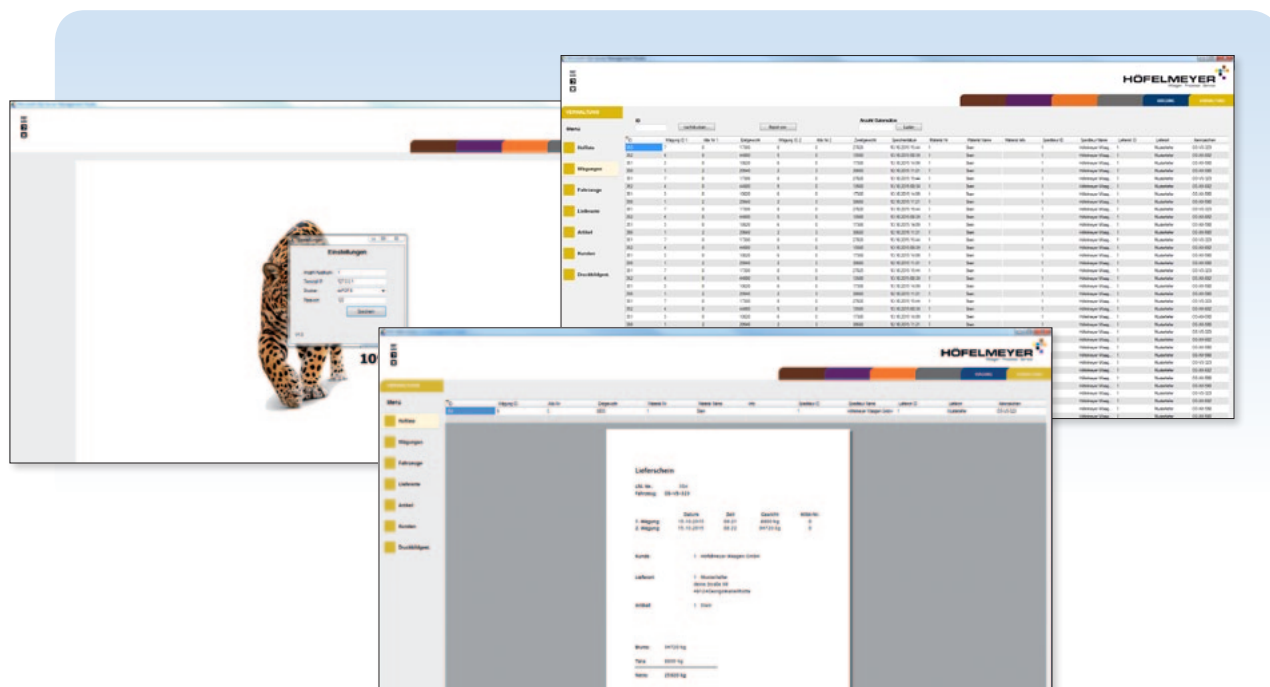

Our HSW-PC-Truck software is used for weighing vehicles and containers, covering a wide range of data evaluation, visualization and logistic requirements. Thanks to the modular concept, even the basic version of the software can be adapted to your requirements or even customized precisely to your needs.

Comprehensive adaptation of documents and the free choice of printer as well as options for connecting the HSW-PC-Truck to existing ERP systems round off the range of possibilities.

## Characteristics

- Interface design according to current concept
- Protected user areas increase consistency and data security

- Storage area/container-location management
- Central data management for all connected vehicle scales
- All requirements made by the German measuring and calibration law are fulfilled
- Requirements of SOLAS container weighing are fulfilled
- Import and export of data with a range of different standards
- Data evaluation; yard list, locations, contents and quantity evaluation of containers
- Visualization of data, quantities, warehouse and layout plans
- System requirements: Windows 7 or higher/ Linux
