

test weight

precise | compact | hygienic

Advantages

- Made completely of stainless steel
- Easy to clean
- Easy to move with fork-lift truck/pallet truck
- Safely stackable when testing heavy loads

The good way to test

An ideal tool to complement the professional management of test equipment as part of quality management. This weight combines the requirements of standards on a weight with what we expect a hygienic product to look like.

Ideal for use in the food and pharmaceutical sectors. Easy to move with fork-lift or pallet truck.

In connection with a DAkkS calibration certificate or some other calibration, this test weight provides ideal support when monitoring test equipment. It can also be used to align or recalibrate scales.

Options

- DAkkS calibration or calibration service
- V4A stainless steel
- Without calibration
- Alternative nominal values
- Alternative class (M2, M3)
- Alternative dimensions

Characteristics

- Dimensions: 840 mm x 840 mm x 210 mm
- Nominal weight: 500 kg
- Precision category M1
- Stainless steel blasted with glass beads
- 4 stacking feet
- 4 balancing chambers with sealable chamber lock
- Serial number for identification
- Low center of gravity
