

Weighing Terminal HTF400E

universal | compact | legal for trade

Benefits

- Integrated ethernet and USB host interface on board
- Integrated WLAN as option
- Fast, current processor technology
- Bright, high-contrast TFT color display
- Direct access to files in the PC network
- Powerful standard programs included
- Modular interface design

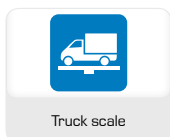

Simply good

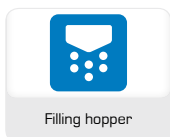

The HTF400E is a compact industrial terminal in stainless steel housing which is ideal for all standard applications. It is easily configurable, robust and the ideal terminal for the simple application. Many integrated standard software programs allow various use of the device.

Designs and options

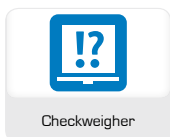

- for desk-top/wall-mount installation or as panel-mount version up to IP69K
- integrated keyboard, function keys and soft keys
- print label design via PC software
- with integrated 110–240VAC or 12–30VDC power supply unit
- Operating temperature: -10°C to +40°C, 95 % relative humidity, non-condensing
- 32-bit ARM processor, 266 MHz
- 0,5 MB data memory (expandable)
- Linux based operating system with realtime-multitasking
- security: data protected against power failure, password security, weight data storage in internal Alibi Memory
- remote access via internet is also possible
