**INDIVIDUAL  
EVALUATION OPTIONS**

**CENTRAL  
DATA MANAGEMENT**

**IMPROVED EFFICIENCY  
AND QUALITY ASSURANCE**

# IRIS

Quality management software

# IRIS

## WE DIGITISE YOUR PRODUCTION

**Innovative, modular and intuitive:** IRIS takes your production to the next level. Our software platform helps you digitise your processes, network machines and evaluate all data streams. We integrate non-automatic scales, such as those frequently used for random sampling, dynamic scales such as checkweighers for 100 % inspection, and foreign object detection devices such as metal detectors into one software package.

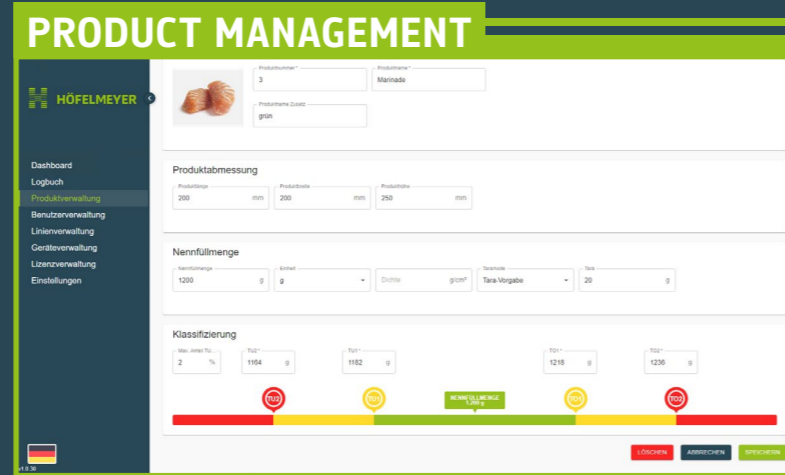

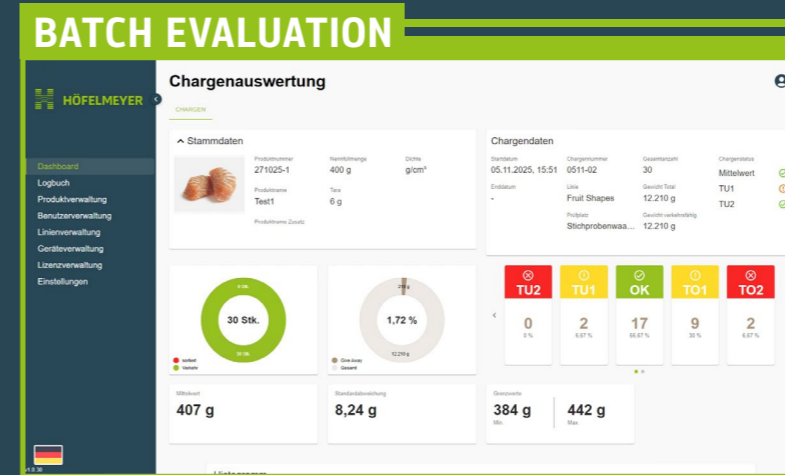

### CUSTOMISABLE USER AND ROLE MANAGEMENT

The integrated rights system and the modular structure of the software allow user and role definitions to be adapted to your needs.

### COMPREHENSIVE EVALUATIONS

The dashboard is the central interface for your production data. Overviews of active and completed batches, as well as statistical evaluations, provide a detailed overview of your production.

### PERMANENT DOCUMENTATION

An integrated logbook records almost everything. Tolerance violations, rejections, foreign object findings or changes to product information are continuously logged and thus made traceable.

### CONTINUOUS DEVELOPMENT

IRIS is continuously being developed. This means keep the software up to date and can respond to market demands and integrate new functions

### CENTRAL PRODUCT MANAGEMENT

Master data maintenance is divided into general and device-specific information. This ensures that the appropriate data is always available for testing.

# TOP 5 BENEFITS

## 1. AUDIT SECURITY

IRIS is the central authority for data collection and documentation, bringing everything together in a closed system. It replaces manual protocols, reduces sources of error and creates a consistent database that can be checked and audited at any time.

## 2. QUALITY ASSURANCE AND EFFICIENCY IMPROVEMENT

The evaluations indicate when intervention in current batches is necessary and also allow conclusions to be drawn about optimisation potential for increasing efficiency.

## 3. FAST ACCESS TO RELEVANT EVENTS

Extensive filter options allow a quick, cross-line view of key events in production.

## 4. TEST VALIDATION

Automatic validation ensures that no product tests are carried out on unsuitable equipment. This prevents overly coarse digit increments within the scope of the Prepackaged Goods Regulation or insufficient clearance height of a metal detector.

## 5. INDIVIDUAL RIGHTS MANAGEMENT

You decide whether to use one of our predefined schemes or create your own tailored to your ideas and specifications.

## THE SOLUTION FOR YOUR COMPANY

## OPTIONS AND EXTENSIONS

# WHY HÖFELMEYER?

## OUR GUARANTEE OF SUCCESS

### From the beginning ...

We don't sell our customers products, but solutions. To do this, we first take a close look at your company and then adapt our scales exactly to your production environment with millimetre precision.

### ... until the end!

We won't leave you on your own, we will help you with process integration and show you ways in which you can make your processes more digital, more productive and more resourceefficient within the scope of your possibilities and with the help of our innovations.

## OUR SERVICES

### ALWAYS THERE FOR YOU

**From comprehensive and customised advice, installation and process integration to commissioning and maintenance:** we are your reliable partner throughout the entire product life cycle – fast, uncomplicated, quality-focused and at eye level.

But that's not all: we are also happy to support you with your third-party products.

**Just get in touch with us!**

**Consulting | Training**  
Our expertise  
for your process

**Remote service**  
Your free  
online support

**Repairs | Maintenance**  
Uncomplicated and  
fast help

**Renting | Leasing**  
A real investment  
alternative

**Calibrations | DAKK**  
For metrological safety

**Maintenance | Servicing**  
For long-lasting products
